

## Real Time Temperature Monitoring

**CARGO DATA**  
**LIGHTNING**  
**REAL TIME**

Actual size: 4" x 2.5" x .75"

## Lightning Real Time Features:

- Complete, automated FSMA temperature monitoring compliance in a single instrument
- Real Time temperature and location data available 24/7
- On-board light sensor captures door open/close events
- Archived data viewable online

**Lightning Real Time** monitors and archives all temperature and location data while your perishable shipment is in transit, providing complete documentation in accordance with all FSMA and HACCP requirements for human and animal food products. **Lightning Real Time** is truly a "set it and forget it" instrument which brings easy regulatory compliance.

**Lightning Real Time** is designed to interface with Cargo Data Corporation's Lightning smart device App upon arrival at destination. **Lightning Real Time** supports input of arrival quality documentation, accept/reject notes, and even product photos.

All **Lightning Real Time** temperature and location data can be reviewed online 24/7 on Cargo Data Corporation's secure cloud server.

FSMA compliance has never been easier!

**Also Coming Soon: iMAT 2-Real Time temperature monitoring systems for use from distribution center to stores.**

Complies with:
