

Express

Receivers' Number One Choice!

Complete the Package: Add Express for Quantum Leap Improvement in Receiving/QA Operations

Cargo Data's patented **Express** handheld data retrieval device provides instant viewing of vital digital temperature recorder data. Receiving and/or QA staff can place any Cargo Data digital temperature recorder* in the **Express** dock for a quick 5 second download. Once data is downloaded from the recorder, the familiar line graph chart is displayed on the large color LCD. Data can also be viewed in tabular format.

With the easy to use on-board keypad, Receivers can add documentation such as purchase order number, carrier, commodity, etc., to the temperature record. **Express** improves operational efficiency by eliminating staff trips to the Receiving Office to view/print a temperature record.

Express enables rapid "batch" PC downloads of up 100 records at a time, time in 4 minutes. This greatly reduces time spent by personnel to download and archive individual records from used recorders.

To further optimize operational efficiency, **Express** is Radio Frequency enabled. **Express** can wirelessly download temperature data from Cargo Data's Select RF digital temperature recorders. Wireless downloads allow Receiving and QA staff to view temperature data while standing on the dock plate before the product has been off-loaded. This quantum leap in efficiency completely eliminates all labor costs associated with handling product rejected due to temperature abuse.

Express provides Receivers and QA personnel with the temperature information they need where they need it, when they need it.

Express, combined with highly accurate Cargo Data digital temperature recorders, provides superior efficiency and ability to execute critical QA and HACCP protocols.

**Quality USB excluded*

Quality Blue

Orange Wedge

Boomerang Boomerang RF Reusable

Specifications:

- Large color LCD screen
- LED out of range alert
- On-Board keypad for documentation data entry
- Data acceptance speed: Less than 5 seconds per record via dock or RF
- Storage: Saves up to 100 records, downloads to PC via cable in 4 minutes
- RF Signal frequency: 916 mHz
- Interference: Signal does not interfere with passive RFID labels
- RF Range: Transmits up to 300' line of sight
- Downloads to PC via mini USB 2.0 cable (provided)
- Rechargeable battery (charger provided)
- Size: 6.5" x 2.75" x .75"
- Weight: 5.6 oz

All product features, specifications and appearances may vary due to technical advances.
