

Smart Phone Tech Comes to Temp Monitoring!

CARGO DATA **LIGHTNING** NFC

Actual size: 3" x 1.6" x .375"

- ⚡ Easy regulatory compliance with all existing and proposed Food Safety Modernization Act temperature monitoring requirements
- ⚡ Most powerful cloud based temperature monitoring/ QA tool available
- ⚡ NFC (Bluetooth-like wireless) eliminates the need for cords, readers, and printers. No corporate network resources needed

Lightning NFC

Features:

- Works with all NFC enabled ANDROID smartphones and tablets. Ideal for export and domestic shipments.
- Temperature Data can be viewed worldwide immediately upon arrival at www.LightningNFC.com.
- **Lightning APP** is a free download from GOOGLE Play.

Lightning NFC (near field communications) brings Smart Phone sophistication and low-cost regulatory compliance to temperature controlled receiving docks.

Remarkably simple and easy to use, **Lightning NFC** instruments accurately capture in-transit time and temperature data for all perishable shipments.

Immediately upon data retrieval, the free **Lightning APP** will display a full temperature chart for the monitored period. The user can add documentation like Purchase Order number, commodity, and other data points to the temperature record. **Lightning APP** also includes fields for quality factors and up to three pictures of the monitored products.

All temperature, shipping, quality factors, and images are automatically uploaded to Cargo Data's cloud servers for permanent archiving and online access.

Complies with:
